

Producing and supplying safety lighting solutions for both the automotive and industrial markets, Vision Alert Automotive Limited operates an Environmental Management System in accordance with the requirements of BS EN ISO14001:2004.

The management of Vision Alert Automotive Limited is committed to:

- Undertake activities that are instrumental in improving the environment.
- Strive to prevent and control pollution, conserve energy and natural resources.
- Reduce waste and its impact on the environment.
- Protect and improve the environment by complying with all applicable environmental regulations / requirements and to meet all new regulations as soon as is reasonably practicable.

The Environmental Policy, which includes a commitment to continual improvement and pollution prevention, shall be reviewed periodically, referring to the company's objectives, targets, audit programme and documented Environmental Manual.

To accomplish the environmental goals, the following environmental principles have been established,

- Reduce waste production through implementing the waste hierarchy principle (reduce, reuse, recycle).
- Monitor, efficiently use and, where practical, reduce energy usage.
- Minimise packaging and packaging waste.
- Reduce usage of all main raw materials, including paper, increase recycling and encourage use of non-paper communication such as e-mail and telephone.

The structure of the Environmental Management System is defined in the Environmental Manual, and along with this Environmental Policy, is regularly reviewed in order to ensure its continuing suitability.

All personnel will be made aware of this Environmental Policy and their responsibilities in respect of the Environmental Manual.

Mike Clark
Managing Director
